Irbid, Jordan | 0772975203 | mohammadalmth2004@gmail.com

Professional Summary

IT Project Manager and Web Engineer with 3 years of experience leading and delivering technical projects. Strong background in project management, team leadership, and building scalable web solutions using modern front-end technologies including React and TypeScript. Experienced in managing full software development life cycle and delivering business-focused technical systems.

Professional Experience

IT Project Manager & Web Engineer

Freelancer | Founder – Web Build

2023 – Present

- Led and managed multiple technical projects from requirements gathering to deployment.
- Managed project timelines, scope, and deliverables while coordinating with stakeholders and development teams.
- Built a Request for Quotation (RFQ) system to automate pricing requests and approvals.
- Developed a standalone logistics services management system.
- Designed and implemented a web-based financial management application with transaction tracking, expense and revenue visualization, and financial reports.
- Created a developer productivity platform that generates front-end styles without manual coding, accelerating UI development.
- Currently leading the development of an internal system for Web Build to support company operations and scalability.

IT Project Manager – Construction Company Project

Contract Project

- Managing and delivering a technical system for a construction company.
 - Developing an RFQ system integrated with a separate logistics services platform.
 - Designing and implementing a complex admin dashboard enabling full system control without developer intervention.
 - Ensuring system reliability, scalability, and alignment with business requirements.
-

Education

Bachelor of Management Information Systems (MIS)

Al al-Bayt University (AABU)

Third Year Student – Expected Graduation: 2028
